Available in 16gms and 25gms cartridges
Packs of 3's and workshop boxes

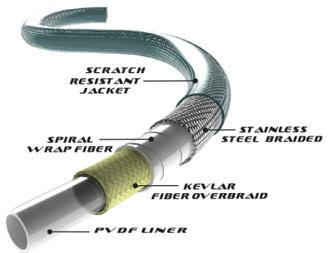

FLUIDLINES®

FluidLinesTM is a super flexible, high performance hose that is designed for smooth fluid transfer with superior heat management and high impact strength to limit fluid expansion.

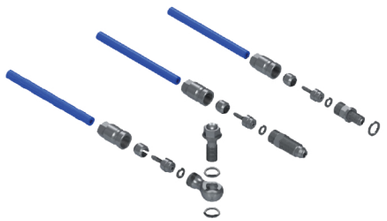

ABRAMS®

Kevlar fiber overbraid with PVDF underlay reinforced with spiral fiber wrap and strengthened with AISI 304 stainless steel wire mesh. A scratch resistant polymer jacket for added outer protection.The ultimate in hose technology.

Fast-Fix Fittings

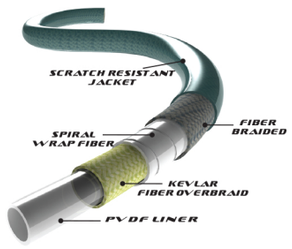

FLUIDLINES ABRAMS

Part No.	Color	Structure	Hose	Compatibility	Fittings	Color Photo
FDL6601	Carbon Black	S/Steel	2800 mm	Universal	Front & Rear	
FDL6602	Transparent	S/Steel	2800 mm	Universal	Front & Rear	

SHERMAN®

PVDF liner reinforced with Kevlar fiber overbraid and added with spiral fiber wrap with braided fiber mesh and a scratch resistant polymer jucket for extra outer protection.

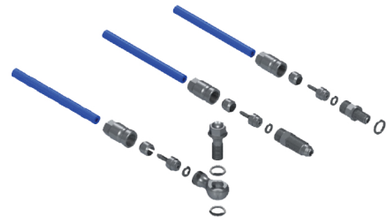

Fast-Fix Fittings

AIRFINN™

AIRFINN Disc Pads feature a Carbon Metallic Friction Compound with an Aluminum Backing Plate and Heat Sink Cooling Fins. These Re-usable Heat Sink Cooling Fins Absorb and Dissipate Heat Away from the Backing Plate to Prevent Thermal Transfer to the Brake Caliper.

Advantages:
* Re-usable Heat Sink Cooling Fins
* Carbon Metallic Friction Compound for Extreme Heat Resistance
* Excellent Braking Performance for All Weather Application

CERAPLASMA™

CeraPlasma TM disc pads is a patented process of spraying of molten or heat soften ceramic material onto a metal backplate to create a thermal barrier or insulator to disperse heat from transferring to the caliper components.
It added a layer of ceramics that provide corrosion protection

- Carbon friction material for extreme heat resistance
- Delivers excellent stopping power for both dry and wet
- Superior durability for longer pads wear

20PAIRS

AXU / GXR

VRX / XBR

Organic (GXR)

* Fiber Compound Pads
* High Braking Performance for both Dry and Wet
* Longer Pads Wear Compare to other Organic Pads
* Higher F iction Coefficient for More Stopping Power
* Asbestos Free

Carbon Metallic (AXU)

* Both Fiber and Metallic Compound Pads
* CeraPlasma - Ceramic Coated Thermal Barrier Backplate
* Carbon Friction Material for Extreme Heat Resistance
* High Friction Coefficient for Excellent Stopping Power
* Superior Durability for Longer Pads Wear
* Excellent for both Dry and Wet
* Asbestos Free

E-Bike Carbon Metallic (VRX)

* Specially formulated for Heavy Duty Electric Bikes
* CeraPlasma - Ceramic Coated Thermal Barrier Backplate
* Carbon Friction Material for Extreme Heat Resistance
* High Friction Coefficient for Excellent Stopping Power
* Excellent Stopping Power for all Weather Application
* Superior Durability for Longer Pads Wear
* Asbestos Free

Carbon Sintered (XBR)

* All Sintered Metal Compound for Excellent Stopping Power
* CeraPlasma - Ceramic Coated Thermal Barrier Backplate
* Carbon Friction Material for Extreme Heat Resistance
* High Friction Coefficient for Excellent Stopping Power
* Triple Pads Wear compare with Organic Pads
* All Weather Application

BRAKE FLUID

Mineral Oil
Non-corrosive, high boiling point and viscosity index
for thermal and shear stability.
Environment friendly and suitable
for all mineral based hydraulic brakes.

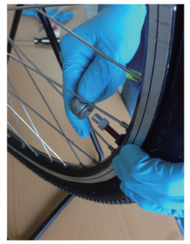

D.O.T. Fluid
Advance high performing Polyglycol D.O.T. brake
fluid are engineered for optimum performance under
high temperature.Minimizes corrosion of brake
components and rubber friendly.

INTERNAL ROUTING SYSTEM

Helps in the installation of internal routing of brakes & gear housing,inner cables, hydraulic hose and electronic wiring in aluminum,titanium and carbon frames.

IRXS2.0

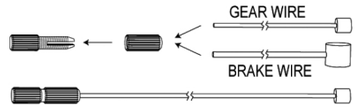

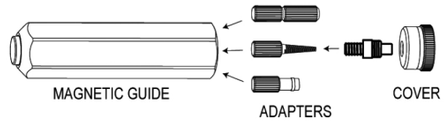

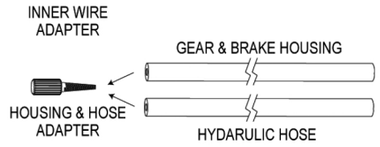

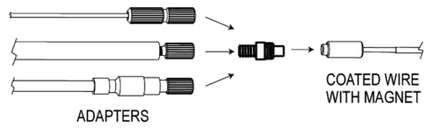

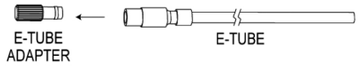

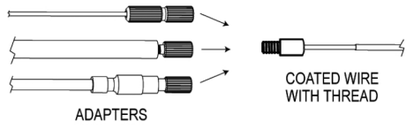

Coated wire with magnet is to be use for easy to pull wire & housing

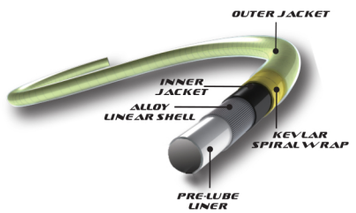

Coated wire with thread is to be use for hard to pull wire & housing

ULTRALITE™

Ultra-lightweight aluminum linear shell structure reinforced with spiral wrap Kevlar fiber for precision.
This compressionless housing is 50 percent lighter compare to other housing and double jacketed for all weather proofing.
Prelube liners for friction free performance.

FLEXLINES™

Flexlines cable system is an improved version of the original equipment used on most bikes.
Its hyperformance housing uses pre-lube liner for smooth braking and gear shifting.
Ultra-slick, rust proof stainless steel inner wires are pre-stretched with flat surface for less friction and maximum precision.

FLEXLINE PLUS

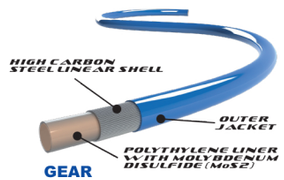

FLEXLINES PLUS uses a Polyethylene (HDPE) liner filled Molybdenum Disulfide (MoS2) for self-lubricating properties.
Molybdenum Disulfide or MoS2 is refer as a dry lubricants that reduces friction from two sliding surfaces with minimal applied force.
It added a thin layer of high lubricity solid lubricants that has a low coefficient of friction resulting in smooth motion transfer.
MoS2 are widely used in aerospace,defense and automotive industry that requires high lubrication at extreme temperature such as engines and rocket launchers.

FLEXLINES PLUS uses high carbon steel shell structure for durability and rigidity at high strength.

- Self-lubricating
- High carbon steel shell for rigidity
- Low coefficient of friction for smooth motion transfer

Molecular structure of HDPE liner filled MoS2

31 WIRES SLICK STAINLESS

Super Slick Polished Stainless Steel wire are highly flexible, pre-stretched with flat surface that eliminates friction for precision. Its super flexible 31 wires structure are design for curves and angles to provide excellent shifting and braking.

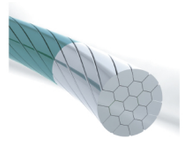

GSK031 -Gear
BSK031 -Brake

ULTRA-SLICK COATED STAINLESS

Ultra-slick,P.T.F.E.coated stainless are self lubricating,all weather proofing.
Pre-stretched slick that create flat surface for maximum precision and friction free performance.

GUL210 -Gear
BUL170 -Brake

MICROARC PLASMA VECTOR

MicroArc Plasma Vector(MPV) is an electrochemical coating process to provide continuous surface barrier that reduces friction and offer wide protection against wear and corrosion. Pre-stretched slick stainless creates ultra slick flat surface for smooth and precise gear shifting and braking.No lubrication needed.

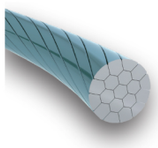

COATED STAINLESS

Pre-stretched slick stainless inner wires coated with P.T.F.E. (Polytetraflouroethylene) for all weather proofing, self lubricating and friction free performance.

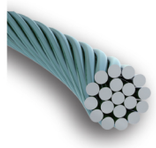

SLICK STAINLESS

Slick stainless are pre-stretched, rust proof inner wires with flat surface for less friction and long lasting.

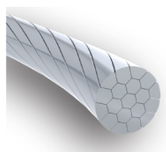

STAINLESS STEEL

Rust proof stainless steel inner wires are corrosion resistant for longer use life.

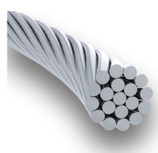

SLICK GALVANIZED

Galvanized coated pre-stretched inner wires with flat surface for less friction.

GALVANIZED STEEL

High quality standard galvanized coated inner wires for regular use.

INNER WIRES

Brake & gear inner wires are manufactured from the highest standard.
Available in packs of 100's

RIMS

Quaxar Super Alloy Rims are developed to offer superior strength twice than other conventional alloy rims. These Super Alloy are treated to T-10 manufacturing where they are cooled from an elevated temperature shaping process, cold worked, then artificially aged. This kind of process ensures the stability of the aluminum alloy from all kinds of rugged terrain while conventional alloy are only solution treated (T-6) and then artificially aged.

HIGH PRECISION BEARING

Quaxar's high precision ball bearing are designed and manufactured with a high degree of running accuracy, high system rigidity, low heat generation and vibration. Optimal materials and precision manufacturing provides minimum friction for longer bearing service life.
